

.....**SINGLE-USE PLASTIC POLICY**

..... group is committed to striving to create a fairer, greener world and the group works to encourage sustainable and thoughtful use of the world's resources.

As part of our vision for a greener world, group recognises that single use disposable plastics pose a threat to our local and global environment and we are committed to working with our local community and council to reduce reliance on single use disposable plastics wherever possible.

Single-use disposable plastics, are typically used only once before they are thrown away or recycled, and include plastic bags, straws, coffee stirrers, soda and water bottles, plastic cups and most food packaging.

..... group is committed to:

- Discouraging the use of single use plastics and taking steps to reduce the use of plastic wherever possible.
- Encouraging the use of tap water over bottled water and the use of reusable containers to encourage the reduction of plastic packaging waste
- Using our best endeavours to ensure that single use plastics are not used or brought into our premises by group members or members of the public.

The group supports the objective of Keynsham Town Council in encouraging Keynsham to become a single-use plastic free town and will work with KTC in striving to achieve that aim.
